****Description of Major:**

The Applied Technology Studies major is a flexible baccalaureate degree designed for students who desire to combine course work in more than one discipline area for business, professional, or personal reasons. A faculty adviser works with each student to design a course sequence that best meets the student's future plans. This major is ideal for working professionals completing a degree on a part-time basis, or for transfer students seeking a B.S. in areas not directly aligned with their previous major. Online courses and internship opportunities are available.
